

Corn Products Specialty Ingredients offers custom sweeteners and excipient solutions to help balance and improve nutritional and pharmaceutical formulations.

Whether you are looking to improve the sweetness profile of your low-sugar nutritional bars, prevent crystallization in your cough syrup formulation, or mask functional ingredient off-notes in your chewable vitamin application... we can help!

With more than eighty years of combined experience working with polyols across a wide range of applications, the technical team at Corn Products Specialty Ingredients has the expertise to help you find the right balance of taste, sweetness and functionality for your nutritional and pharmaceutical formulations. From single polyols to complex polyol-based sweetener systems, we will work with you to find the right solution to meet your specific needs. Our wide range of compendial pharmaceutical sweeteners and excipients are produced in FDA-registered, cGMP facilities. Together with our seasoned sales professionals, we will help ensure that your development goals are met while keeping within your given cost, manufacturing and regulatory parameters.
