CORN PRODUCTS INTERNATIONAL IS THE 2009 RECIPIENT OF FROST & SULLIVAN'S EMERGING COMPANY OF THE YEAR AWARD IN THE GLOBAL STEVIA SWEETENERS MARKET

Stevia Product Broadens Company's Sweetening Solutions Portfolio

WESTCHESTER, IL, December 11, 2009 -- Corn Products International, Inc., a leading global provider of agriculturally derived ingredients for diversified markets, was selected to receive Frost & Sullivan's "Emerging Company of the Year Award" for its entry into the global stevia sweeteners market.

The award recognizes Corn Products' decision to partner with Morita Kagaku Kogyo Company Ltd. (Morita), a highly reputable business in the stevia industry, to offer its customers Enliten™ high intensity sweetener - a naturally based sweetener that comes from Morita's patented stevia plant variety.

Frost and Sullivan considers the commercially available Enliten a significant contributor to the advancement of the food and beverage industry, by responding to the unmet consumer need for a low-calorie sweetener that tastes good.

The award points to Corn Products' quality standards, technical and regulatory expertise, effective marketing initiatives and continued endeavor to strengthen the supply chain, all of which reinforce its emergence as a significant long-term stevia-based sweetener solutions supplier.

These factors, along with Corn Product's partnership with Morita, "demonstrate the company's strategic excellence over competitors, making Corn Products the worthy recipient of the 2009 Frost & Sullivan Emerging Company of the Year Award in the global stevia sweeteners market," according to Frost & Sullivan Analyst Sneha Pasricha.

For more information about Enliten™, visit www.enlitenSweetener.com.

About Corn Products International, Inc.

Corn Products International is one of the world's largest corn refiners and a major supplier of high-quality food ingredients and industrial products derived from the wet milling and processing of corn and other starch-based materials. The Company, headquartered in Westchester, Ill., is a leading worldwide producer of dextrose and a major regional producer of starch, high fructose corn syrup and glucose. In 2008, Corn Products International reported net sales and diluted earnings per common share of \$3.94 billion and \$3.52, respectively, with operations in 15 countries at 33 plants, including wholly owned businesses, affiliates and alliances. About Frost & Sullivan Award for Emerging Company of the Year

The Frost & Sullivan Award for Emerging Company of the Year is presented each year to the company that has emerged as a significant participant within its industry. This company is perceived to have exhibited outstanding management, superior market growth, exceptional customer service and the ability to combine technology and successful strategic initiatives. This company has the exceptional know-how to take advantage of market changes through the execution of innovative strategies within the existing competitive landscape.

Research Methodology: In order to select the Award recipient, analysts quantify several market factors for each market participant according to predetermined criteria, paying close attention to their combined operations efforts. This process includes interviews with market participants, customers, and suppliers, along with extensive secondary and technology research. The companies' efforts are then analyzed based on the number of new customers, new segments, and commitment to business expansion coupled with market growth.
