Corn Products International Forms Strategic Relationship with McIntyre Group to Market Starch-Based Ingredients to the Personal Care Industry

April 27, 2006, Westchester, IL - Corn Products International, Inc. is pleased to announce a new strategic relationship with McIntyre Group Ltd. to produce an exciting line of raw materials for the personal care market.

Mackaderm™, a new line of leave-on skin care raw materials from McIntyre, features ingredients from Corn Products International, a leading global supplier of agriculturally based products. Mackaderm ASTO-Dry (INCI: Aluminum Starch Octenylsuccinate) is a naturally derived starch polymer manufactured from waxy corn that provides a soft, smooth feel to skin-care formulations.

Corn Products International is celebrating 100 years of corn refining and supplying the world with high-quality food ingredients and industrial products. Incorporated in 1906, Corn Products International has played a major role in the creation of modern corn refining and is the number-one worldwide producer of dextrose, as well as a leading regional producer of starch, high fructose corn syrup and glucose. For more information about Corn Products' rich history, global presence, and diverse, expanded product line including dextrose, HFCS, corn starches, gluten-free products and other specialty ingredients for the personal care industry visit www.cornproductsus.com.

McIntyre Group Ltd. is a leading manufacturer of high quality surfactants, polymers, chemical specialties and cosmetic preservatives.
